Full Stack Python
Guide to Deployments
by Matthew Makai
Table of Contents

Chapter 1: Introduction .............................................................. 8
  1.1 Who This Book Is For 10
  1.2 Our Deployment 10
  1.3 Deployment Automation 12
  1.4 How to Use this Book 14
  1.5 Services We'll Use 14
  1.6 Our Example WSGI Application 15
  1.7 Ready for Server Setup 16

Chapter 2: Servers ................................................................... 17
  2.1 Hosting Options 19
  2.2 What are Virtualized Servers? 20
  2.3 Obtain your Virtual Server 21
  2.4 Create Public and Private Keys 27
  2.5 Boot the Server and Secure It 29
  2.6 Upload the Public Key 34
  2.7 Restart the SSH Service 35
  2.8 Automating Server Setup 36
  2.9 Next: Operating System 40

Chapter 3: Operating Systems ......................................................... 41
  3.1 Ubuntu 43
  3.2 Installing Ubuntu Packages 44
  3.3 Enable the Firewall 45
  3.4 Ansible 46
  3.5 Automating Operating System Setup 46
  3.6 Next: Web Server 50

Chapter 4: Web Servers ............................................................... 52
  4.1 Web Servers in Our Deployment 54
  4.2 Visualizing our Web Server’s Purpose 55
  4.3 Nginx 56
  4.4 Installing Nginx 57
  4.5 Domain Name Service Resolution 57
  4.6 Configure Nginx Without HTTPS 61
  4.7 Create an SSL Certificate 63
  4.8 Install SSL Certificates 65
  4.9 Configure Nginx with HTTPS 67
